COLOR PLAY CLASS | AUGUST 20, 2018

Color Play

Join **BODYGRAPHY** educator Sami Haberkorn and learn how to play with color on the lids and lips. Create your own pigments by mixing lip/cheek and eye products. Monochromatic looks, heavy on top light on bottom, light on top, heavy on bottom.

Color Play teaches you to embrace the world of color using different textures to enhance your features. Who says Electric Lip Slides are only to be worn on the lips? Try applying them as a cream blush or even mixing them with a Pure Pigment to create a glossy shadow for the lids. In this class students will look outside the box for creative ways to play with makeup –try wearing a pink eye look with red lips, or a modern monochromatic look. This class is for the fun, fearless and creative types –who do not mind getting their hands a little messy! Let your inner Monet out and create some beautifully wearable abstract makeup looks.
